Installing python package

Step 1: open the anaconda navigator. In the start menu

Step 2: open the CMD.exe prompt

Step 3: install the NUMPY package .To enter the numpy package enter the command in the CMD.exe Command:Pip install numpy NUMPY :

Numpy: This package is used to perform numerical computations. This package is pre-installed in anaconda .NumPy is used for working with arrays. NumPy is short for "Numerical Python

A screenshot of the Anaconda Prompt (anaconda3) window. The terminal shows the command `(base) C:\Users\DELL>pip install numpy` being entered. The output is `Requirement already satisfied: numpy in c:\users\de\anaconda3\lib\site-packages (1.21.5)`. The prompt then returns to `(base) C:\Users\DELL>`.

```

Anaconda Prompt (anaconda3)

```

Step 4: install the pandas package .To enter the pandas package enter the command in the CMD.exe Command: Pip install pandas Pandas :

Pandas is one of the most widely used python libraries in data science. It provides high-performance, easy to use structures, and data analysis tools. This package is pre- installed in anaconda. is an open-source library that is built on top of NumPy library. It is a Python package that offers various data structures and

operations for manipulating numerical data and time series. It is mainly popular for importing and analyzing data much easier. Pandas is fast and it has high- performance & productivity for users.

```

Anaconda Prompt (anaconda3) - pip install pandas

Step 5: install the Matplotlib package .To enter the Matplotlib package enter the command in the CMD.exe Command: Pip install Matplotlib Matplotlib :

Matplotlib is a comprehensive library for creating static, animated, and interactive visualizations in Python. This package is pre-installed in anaconda .Matplotlib is an amazing visualization library in Python for 2D plots of arrays. Matplotlib is a multi-platform data visualization library built on NumPy arrays and designed to work with the broader SciPy stack. It was introduced by John Hunter in the year 2002.
